LAB REPORT on

Object Oriented Java Programming (23CS3PCOOJ)

Submitted by

Kavya Singh (**1BM23CS146**)

in partial fulfillment for the award of the degree of
BACHELOR OF ENGINEERING
in
COMPUTER SCIENCE AND ENGINEERING

B.M.S. COLLEGE OF ENGINEERING

(Autonomous Institution under VTU)

BENGALURU-560019

Sep-2024 to Jan-2025

B.M.S. College of Engineering
Bull Temple Road, Bangalore 560019
(Affiliated To Visvesvaraya Technological University, Belgaum)
Department of Computer Science and Engineering

CERTIFICATE

This is to certify that the Lab work entitled “Object Oriented Java Programming (23CS3PCOOJ)” carried out by **Kavya Singh (1BM23CS146)**, who is bonafide student of **B.M.S. College of Engineering**. It is in partial fulfillment for the award of **Bachelor of Engineering in Computer Science and Engineering** of the Visvesvaraya Technological University, Belgaum. The Lab report has been approved as it satisfies the academic requirements in respect of an Object Oriented Java Programming (23CS3PCOOJ) work prescribed for the said degree.

Lab faculty Incharge Name Assistant Professor Department of CSE, BMSCE	Dr. Jyothi S Nayak Professor & HOD Department of CSE, BMSCE

Program 1

Quadratic Equation

Algorithm:

Code:

```
import java.util.Scanner;
```

```
class Coeff {  
    double a;  
    double b;  
    double c;  
}
```

```
class PrintInfo {  
    static void print() {  
        System.out.println("Name: Kavya Singh");  
        System.out.println("USN: 1BM23CS146");  
    }  
}
```

```
public class QuadraticEquation {  
    public static void main(String[] args) {
```

```
        Scanner scanner = new Scanner(System.in);  
        Coeff coeff = new Coeff();
```

```

System.out.println("Enter the coefficients of a, b, c:");

System.out.print("Enter coefficient a: ");
coeff.a = scanner.nextDouble();
while (coeff.a == 0) {
    System.out.println("Not a quadratic equation. Please enter a non-zero value for a:");
    coeff.a = scanner.nextDouble();
}

System.out.print("Enter coefficient b: ");
coeff.b = scanner.nextDouble();
System.out.print("Enter coefficient c: ");
coeff.c = scanner.nextDouble();

double d = coeff.b * coeff.b - 4 * coeff.a * coeff.c;

if (d == 0) {
    double r1 = -coeff.b / (2 * coeff.a);
    System.out.println("Roots are real and equal.");
    System.out.println("Root 1 and Root 2: " + r1);
} else if (d > 0) {
    double r1 = (-coeff.b + Math.sqrt(d)) / (2 * coeff.a);
    double r2 = (-coeff.b - Math.sqrt(d)) / (2 * coeff.a);
    System.out.println("Roots are real and unique.");
    System.out.println("Root 1: " + r1);
    System.out.println("Root 2: " + r2);
} else {
    double realPart = -coeff.b / (2 * coeff.a);
    double imaginaryPart = Math.sqrt(-d) / (2 * coeff.a);
    System.out.println("Roots are imaginary.");
    System.out.println("Root 1: " + realPart + " + " + imaginaryPart + "i");
    System.out.println("Root 2: " + realPart + " - " + imaginaryPart + "i");
}
PrintInfo.print();
scanner.close();
}
}

```

Output:

```

Program 5

Bank

Algorithm:

6. Create a Java program to create Bank that maintains the list of account for its customers, calculate savings account and the other account account the saving account provide interest and withdrawal facilities but no charge bank fee. The normal account provide charge bank fully but no interest account. Withdrawal should also withdraw a minimum balance and if the balance falls below this limit, a notice change is issued.

Create a data Account that store customer name, account number and type of account from this data the class can read and the user can create three more objects to their requirements. Include the necessary methods to create the following tasks:

- Account type 1: Normal account and update the balance
- Account type 2: Savings account
- Account type 3: Current account and update the balance
- Account type 4: Fixed deposit account
- Account type 5: Recurring deposit account
- Account type 6: Recurring deposit account
- Account type 7: Recurring deposit account
- Account type 8: Recurring deposit account
- Account type 9: Recurring deposit account
- Account type 10: Recurring deposit account
